

Attachment E—Cost Sharing Limits

Cost Sharing Limits

The state has not included cost sharing limits in its waiver proposal. However, the state has asked its actuarial consultant to calculate average per member per month out-of-pocket expenses based on expected utilization of services and the state's first year cost sharing amounts. Using the data from the actuary and the average monthly income for the eligibility group, the state has calculated the following expected cost sharing percentages for the eligibility group:

Eligibility Group	Expected Cost Sharing as a Percent of Countable Monthly Income
Section 1931 Group	3.1%
Under 21 Group (i.e., 19 and 20 year olds)	2.2%
Caretaker Relative Group	2.2%
